## ABOUT US

LITIKUM is the yearly published journal of the **Lithic Research Roundtable (LRR)** that unites prehistorians and archaeologists in Hungary, those are interested in lithic studies. LRR, since 2010, organizes annual meetings that take place always on the first Friday of December in every year. The Roundtable is a forum for presenting on-going research, new approaches and methods related to lithic analysis.

## OUR AIMS

LITIKUM publishes scientific articles (1) from the field of lithic research of Palaeolithic, Mesolithic, and Neolithic in the Carpathian Basin and its environs, and (2) developing theoretical and methodological issues related to the field of lithic studies in general.

We accept short contributions, lengthy reports, reviews, and problem-oriented articles. Concise updates of research in progress are also welcome. Fundamental policy of the journal is publishing original research results.

LITIKUM appears in a single volume per year. The approved manuscripts are released at the web page [www.litikum.hu](http://www.litikum.hu) as free downloadable pdf articles. Our goal is to publish scientific research results free of charge with an open access electronic journal, LITIKUM.

## GUIDELINES FOR AUTHORS

Processing manuscripts for publication is continuous. Manuscripts submitted until the end of November appear in the volume of the year of submission. Each volume is closed at the end of November. Manuscripts arrived in December will be published in the volume of the next year. Manuscripts can be submitted in Hungarian, English, and French to the journal's email address ([litikum@litikum.hu](mailto:litikum@litikum.hu)).

Manuscripts can be published only after a peer-review process by two anonymous reviewers. Based on the publishing policy of LITIKUM, a manuscript can be accepted to be published relying upon the reviewers' comments without or with revisions of the text. If one of the reviewers propose to reject the paper and the other does not so, a third expert will be involved in the peer-review process. If both reviewers propose rejecting the manuscript, the editors will refuse to publish the paper in LITIKUM. We also refuse publishing papers previously published with the same set of data and conclusion, even if it had been done so in another language.

We kindly ask the authors accept the decision of the editors and take into account the advices of the reviewers, because the peer-review process may seriously improve the quality of the paper and thus that of LITIKUM.

## MANUSCRIPT SUBMISSION

We propose the following instructions, by which the publicizing process can be accelerated:

- **Manuscripts** can only be sent to the editors online. MS Word, TEX, and plain ASCII text file formats are accepted. Text must avoid formatting, including page numbering.
- **Figures and tables**, each has to be in separate files. We do not accept tables in xls files. The tables should be unformatted. Figures' minimum resolution is 600 dpi. The required formats are TIFF or JPEG that may be black-and-white, grayscale, or color.
- Please, list the **captions** for figures and tables in a separate file.
- The **first page** (title page) of the manuscript contains the: (1) title of the paper, (2) name of the author(s), (3) affiliation of the author(s), including address and email address, (4) abstract and keywords in the paper's language and in English.
- Hungarian papers are welcome to contain a longer **English summary**, which will appear at the end of the text. The resume must offer a clear, easy summary of the article.
- We recommend to build the manuscript on the **structure** as follows:
  - introduction
  - data and methods
  - discussion
  - conclusions
  - acknowledgement
  - list of references
- This structure sheds light on the nexus between data and methods used by the author to reach conclusions, as well as the validity of the latter.

- 
- Notes and footnotes are unaccepted. Please, place all information into the main text. Phrase your acknowledgements and laudations in a distinct heading, after the main text, before the bibliography. The **references** should be placed in the text as follows:
    - one author: (Kovács 1978), with pages: (Kovács 1978: 12)
    - two authors: (Kovács, Nagy 1978)
    - more than two authors: (Kovács et al. 1978)

- The **list of references** has to be in alphabetical order of authors. The reference list formats are:

**book (author year. title. publication place: publisher.):**

*Kovács L. 1978. A Nap rendszer eredete. Budapest: Galaktika Kiadó.*

**journal article (author year. title. journal volume/tome: pages.):**

*Kovács L. 1978. A Nap rendszer eredete. Földünk 15/3: 23-43.*

**book chapter (author year. title. In: editor (szerk.), book title. publication place: publisher, pages.):**

*Kovács L. 1978. A Nap rendszer eredete. In: Nagy L. (szerk.), Földünk története. Budapest: Galaktika Kiadó, 32-35.*

**In the case of multiple authors, the names should be separated by commas:**

*Kovács L., Nagy L. 1978. A Nap rendszer eredete. Budapest: Galaktika Kiadó.*

- The manuscript files should be named after the author (without accents). Use a simple numbering if you are submitting multiple files, e.g. Kovacs.doc, Kovacs2.doc, Kovacs\_fig01.tiff, Kovacs\_fig02.jpg.
